

THE BRITISH COLONIST.
Thursday Morning, March 7, 1887
TO ADVERTISERS.
To Agents.
The supply of papers will be discontinued. The daily and weekly issues will be furnished at the lowest cash rates and no exception will in future be made to this rule.

The New Tariff.
We sincerely hope that while considering the proposed new Tariff, the Legislative Council, in endeavoring to avoid Charybdis will not be wrecked on Scylla; or that in passing the proposed scale of duties with a view to increasing the revenue, it will not go to such an extreme as to prohibit the importation of certain articles in daily request that cannot be profitably produced here. The report of the Tariff Committee has, no doubt, been carefully prepared; but there are some points contained in the schedule to which we would direct the attention of the Council with a view to avoiding a repetition here (on a small scale) of the evils that the imposition of prohibitive duties have inflicted upon American commerce. On dry goods the Committee propose a duty of 12 1/2 per cent.—a reduction of 2 1/2 per cent. on the present scale. A week or two ago, the importers memorialized the Council to the effect that a duty of not more than 7 1/2 per cent. be imposed on this description of goods. The memorial showed very clearly that if too high a rate was imposed it would injure our foreign retail trade, and that where \$1 in duties would be collected from this source through an increased demand from the South, were the rate fixed at 7 1/2 per cent., 75 cents would not be realized to the revenue if the present duty of 15 per cent. was continued. The importance of this statement does not appear to have been lost on the committee, and hence we find a reduction proposed upon the present rate; but the reduction is not sufficient to meet the case. It is of the utmost importance to the country that no channel of trade at present open to us should be obstructed by any act of our own. Protection cannot be advanced as a reason for a high duty on dry goods, because we have no manufactures of the kind, nor are we likely to have for a decade of years. The object of this duty, then, is to collect a revenue; and if it can be shown that with the rate fixed at 7 1/2 per cent. twice the amount of dry goods will be imported that would be at 12 1/2 per cent., the plain duty of the Council is to reduce the demand to the lesser figure and allow the Government to fob the extra 2 1/2 per cent. In levying a uniform duty of \$1 50 per 100 on cigars we think that a mistake has been made. The rich man's fine Havana, costing \$100 @ \$150 per 1000, will pay no more than the poor man's Manila cheroot, costing \$20 or \$25 per 1000. The effect will be to destroy the market for the commoner grades of cigars and create a considerable deficit in the revenue in consequence. It strikes us that an *ad valorem* instead of a specific duty should be placed on cigars. What has been said of cigars will apply with equal force to tobacco: a duty of 25 per cent per pound will place even the inferior grades beyond the reach of the poor man, and confine the consumption to a very great extent to the higher grades by men who are able to pay for their "baccy." On raw sugar, it is proposed to levy a duty of 1 cent per pound, while refined sugar is only taxed 1 1/2 cents. The raw sugar will, therefore, pay a rate equivalent to 20 per cent., while the refined article will come in upon the payment of some 8 per cent. To equalize the duty in this respect a specific duty of at least 3 cents per pound on refined sugars will be necessary. Imported butter is to be taxed ten cents per pound—another rate that will be almost prohibitive, and when we reflect that the country is not in a sufficiently advanced state—and will not be for a period of two years to come—to supply the local demand for this article of luxury, is most unwelcome. Upon flour, a duty of \$1 50 @ bbl is proposed. This will be a grievous tax to the consumers to bear. Without tobacco, sugar, butter, &c., a man could live comfortably enough, and enjoy better health than if he had them all at his command; but bread he must have; it he desires to support life he must lean upon its "staff." Seventy-five cents, or at most, one dollar per barrel would furnish ample protection to millers; beyond the latter rate, the duty approaches prohibition, and should it be laid on, will have a tendency to check importations, while the charge for flour manufactured in the Colony will always be higher by 50 cents per barrel than it would be were the duty fixed at a reasonable rate. Ale, porter and spirits will pay a small advance on the present rates, which have always been considered higher than a due regard for the extension of our commerce to other parts would appear to warrant. Vegetables will have to pay a pretty stiff duty, and every Sound or Oregon egg cracked on the Island will yield a fraction over one cent

to the Treasury. Salt, which is used extensively in the preservation of fish and meats, is to come in free; so are shipbuilding materials and chandlery (with the exception of blocks, which we do not see enumerated in the free list), seeds, fresh fish, fish-oil and many other articles on which rates are charged in the present scale. Island bacon and hams will be protected by a duty of 4 cents per pound, while corned beef (strange to say) will be admitted on payment of 10 per cent. Machinery, which came in free before, will pay 10 per cent.; and confectionery—which, absurdly enough, pays 12 1/2 per cent. duty under the scale now in force, while sugar is levied upon to the tune of 20 per cent. in the same scale—will very properly contribute 30 per cent. under the new Tariff. The rate proposed on live stock appears to be a compromise between the old Island duties (which were too high) and the mainland rates (which were too low). Blankets are expected to pay tribute at an average rate of 75 cents per pair, which is too high, when we consider that the principal customers are Indians, who believe more in quantity than in quality, and generally buy an inferior article. There is no denying the fact, that the list, in many respects, is satisfactory; but in the instances to which we have drawn attention there is certainly room for improvement.

The Capital Question at Clinton.
CLINTON, Feb. 21, 1887.
Messrs Editors:—Where is the Capital to be? is a question every day asked since the Union of the Colonies has become an accomplished fact; and, according to *Punch*, an accomplished fact is the cleverest thing imaginable. Anyone you meet now, who takes an interest in British Columbia as a Colony, asks, Where is the Capital to be? The replies given to the question are funny: "Well, I guess the old Governor is not fond of change, he has got his books and papers down there at that little place Westminster, which is not fit to be the Capital of a mining camp; I guess he'll stick there." Where is the Capital to be? "Well, you now see the Governor came to Lillooet—fine place, fine farms, plenty wheat, fine climate, fine in de summer, not too very hot, winter no cold, in de spring vegetables before Victoria. He makes one road from Lytton up de river, come to Lillooet, plenty of everything, plenty of shooting on Pavilion mountain, de lake fine, plenty of pleasure boats by and by; de Governor likes fine places, plenty of de siks, plenty of loggers, plenty of everything, Where is the Capital to be? "Oh, it's sure to be at Yale; nothing to surpass the navigation to this place, and from here the great truck road to Cariboo. Telegraphic communication by this route from the north pole to the south; the most central position. The Governor and his advisers know they will preserve these advantages, of course." Where is the Capital to be? "That's our own. I'm told they are going to put it on Bald Mountain; the Governor likes to get near Heaven; and who'll blame him; but so far as I'm concerned, I'd be for keeping it where it ought to be—at Victoria. They have land and "say" there, and tharadine with the whole world, and we'll strike another Cariboo next year in some other corner of the Rocky Mountains; then they'll make another road from Victoria to either Cariboo, and if any any of us makes a fortune we can go down and live like Christians at Victoria; besides, after living like a white man at Victoria, a man could take to the "say" and start home to the old country or meet his people in our own. Replies to very important questions are sometimes given in a most ludicrous way, as if men feared to express their opinions in a commonsense way on a commonsense question, or feared to exhibit ignorance gravely; yet there is some sound reason, almost concealed, sometimes in the clearest language. It is well that the Colonies are united. It would be well if the people were also united—union is strength. We should take a warning from the past, so that we may profit by our errors and derive experience from our follies. T. T.

Fire Annihilators.
Since Barnum, with his great ability in the business of advertising, failed to make his fire annihilator a success—failed because the thing itself was not a success—we have not heard much of fire annihilators, and they were about forgotten until a genius the other day succeeded in obtaining the patent of the Chief Engineer of the Fire Department and several other dignitaries to witness an experiment at Jones' Wood with an apparatus for extinguishing fires. The apparatus is simply a portable can, capable of holding forty to sixty gallons of the liquid annihilator and has adjustable straps attached to it, by which the operator can readily sling it on his back. The inventor had erected a shanty of hemlock boards, into which he had piled straw and other combustible materials. The latter were dried and when in a blaze, the fluid was let on through a few feet of half-inch rubber tubing with a slender nozzle, one eighth inch bore at the end, there being a faucet near the coupling where the tubing is attached. The flame was extinguished within half a minute, though the whole shanty seemed doomed to destruction. Tar barrels were then fired and extinguished also piles of wood saturated with kerosene. Then the shanty was filled with all this debris of wood, saturated with kerosene, tarred and stained with oil, and in a manner and in like manner were extinguished. The experiments were pronounced successful by all present.

A LONG HUNT AND A CLEVER CAPTURE.
Somewhere about the latter end of August or the beginning of September last, a man named George Brown, who had formerly been an officer in the British Army, and had lost his right arm in the Crimean war, suddenly disappeared from Montreal. These are the circumstances:—During the Fenian excitement he received a commission as Lieutenant Colonel in the Canadian Volunteers, in which capacity he was intrusted with the money to pay the men under his command. Suddenly, as above stated, he disappeared, and on matters being investigated, it was discovered that between three and four thousand dollars of the money in his charge had disappeared also. On this discovery being made known, the services of Mr John McLaughlan, Chief of the Government Police in Montreal, were brought into requisition. On the 6th September this gentleman sailed in the *Hibernia* for Liverpool, with instructions to arrest the delinquent. In England he remained five weeks hunting over the length and breadth of the land, and at length discovered the object of his search had gone to Hamburg, in Prussia. Nothing daunted, this energetic and clever detective immediately started from France, passed through Belgium and ascended the Rhine to Frankfurt-on-the-Main, and thence to Hamburg. On reaching Hamburg, he made a tour of the principal streets of the city to the Government officials, by whom the runaway was immediately arrested and handed over to his charge. As speedily as possible he retraced his course, accompanied by the prize he had captured, and both of them reached this city on Saturday night on their way to Montreal. They will resume their journey this morning at 8 o'clock.—*St John Morning News*.

By Electric Telegraph
SPECIAL TO THE DAILY BRITISH COLONIST
LAST NIGHT'S DESPATCHES.
Legislative Proceedings.
NEW WESTMINSTER, March 6.—In the House to-day several messages were received from the Governor assenting to the Ferries, Interests, and English Law Ordinances; enclosing returns of Customs, Fines, Petitions from Cariboo on Law of Debt. Amendments to the Barrister's Bill, the latter of which were adopted in committee, and amendments to the Indian Liquor bill by the addition of the clause requiring a clearance permit from a Custom House officer for the Coasting trade containing a description of the liquors, and a bond of \$1000 with sureties for the due delivery at the place described.
Smith is to move that the Committee of the Whole consider the abolition of road tolls.
Committee of Ways and Means was placed on the orders of the day for to-morrow.
Homestead Bill, second reading to-morrow.
Walkem's Legal Professions Bill read first time; second reading on Wednesday.
Stamp's motion to admit various articles for the use of the men at the mill, and material for working the same, duty free, was discussed a long time. The mover said that the mill would have to be closed unless protected, as it could not find a market in the Colony, and could not compete with foreign markets.
Robson, Walkem, DeCosmos and others favored protection of some kind under the circumstances, and a drawback of 50s per thousand on lumber exported was finally suggested, and the debate was adjourned till Tuesday to allow a scheme to be devised to protect our mills.
Hon Walkem's resolution desiring the adoption of the Admiralty practice as at present followed in England, was agreed to, with the addition of an amendment to DeCosmos that fees taken by the judges be paid into the public treasury for the use of Her Majesty.
Consideration of the Postal Bill in committee concluded proceedings.
Proposed Trades Licences same, with some slight variation, as present licences on the mainland.
RESIGNATION OF LORD CARNARVON.
Capture of the Fenian Leader!
WAR IN INDIA!

Europe.
LONDON, March 3.—The Colonial Minister [Carnarvon] has resigned, for reasons connected with the Reform question. The Reform bill of the Derby ministry will be presented to Parliament on March 11th.
It is reported that despatches have been received here announcing that war had broken out in India.
BERLIN, March 2.—Herr Simon has been chosen President of the North German Parliament. The King of Prussia gives a banquet to the members of Parliament.
LONDON, March 4.—Despatches have been received from Dublin announcing the capture of Col. O'Connor, leader of the late Fenian revolt in Ireland. He was overtaken at Athlone, nearly 200 miles from scene of insurrection.
Eastern States.
WASHINGTON, March 4.—The Speaker of the House submitted a communication from Mr King, Minister to Rome, that there was no truth in the statement that American chapels have been removed outside the city wall of Rome.
Oregon.
PORTLAND, March 6.—Steamer Ajax arrived at six p. m., from San Francisco.
DECREASE OF YANKEES IN NEW ENGLAND.
Dr Allen, of Lowell, Massachusetts, has some figures, fortified by statistics, that the Yankee race is getting run out of New England. In 1765, the population of Massachusetts, in round numbers, was 220,000; in 1860, it was 1,131,000, of whom 260,000 were of foreign birth, not including the children born in Massachusetts of parents of foreign birth, who are classed as Americans. The foreign population produced nearly 1000 more children in 1860 than the entire American population of Massachusetts. The American births are actually less than the American deaths, and the size of American families is becoming small by degrees and unobtrusively less with every generation. Dr Allen tells us that in one town the first generations averaged 9.50 to a family; the second, 7.81; the third, 7.69; the fourth, 7.25; the fifth, 4; the sixth, 2.84. In all the towns examined the early settlers on an average had in each family from eight to ten children; the three successive generations ranged from seven to eight to a family, then about five, while the sixth decreased to less than three. It is surprising how many large families were once found in those old towns. In one small town, settled in 1665, the records attest that there were 26 families, with 10 children each, 20 families with 11 children each, 24 families with 12 children each, 13 families with 13 children each, one family with 15, and one—the crown of all—with 21 children. Eighty-five families in these old times could support 973 children—a juvenile regiment. 'Then,' says the doctor, with a pathetic lament over a decaying generation, 'then large families were common—now the exception, then it was rare to find couples having only one, two or three children—now it is very common. Then it was regarded as a calamity for a married couple to have no children—now such calamities are found on every side of us. In fact they are fashionable.' The adopted citizens eagerly buy land and seldom sell it, and Dr Allen fears that they will yet own the whole Bay State.

Canada.
The lighted dome of the city building at Kingston has been found to answer a purpose for which it was not designed, namely, a beacon or light-house for captains of vessels coming down the lake, and who can see it distinctly six miles off.
The Mayor of Quebec received on the 23rd a letter from George Dixon Esq., Mayor of Birmingham, England, authorizing him to draw on Lloyd's Banking Company, Limited, of the latter city, the additional sum of £200 sterling, on behalf of the sufferers by the late fire.
MONTREAL, Jan. 10.—The *Gazette* publishes a dispatch from Lord Carnarvon to Lord Monck in regard to the sentences on the Fenian convicts. It is very dignified and firm in tone, snubbing Seward severely and declaring that a halter will be the only punishment should the insular attempt of the Fenians be repeated.
The volunteers and the government police returned from Sweetsburg to-day, the Fenian convicts having been removed to Kingston.
MONTREAL, Jan. 11.—There were shipped via Portland to the Lower Provinces from the abrogation of the reciprocity treaty to the end of December last, 151,859 barrels of flour and 1,159 tons of other merchandise. The opening up of the trade by the way of Portland is greatly due to the exertions of the managing director of the Grand Trunk.
The Bank of British North America has subscribed £500 for the relief of the Quebec sufferers.
THE ISLAND OF ST. THOMAS.—It has been rumored at Washington for a long time that negotiations were pending for the purchase by our Government of St. Thomas, and yesterday morning we had a report by Overland Telegraph that the bargain had been consummated, and that the Island is now part of the United States. The West Indies are a string of Islands 600 miles long, extending from the southern point of Florida to the mouth of the Orinoco. About 1,000 miles from Florida, and 38 miles east of Porto Rico, in latitude 18° north, lies St. Thomas, an islet 12 miles long and 2 wide, with a rugged surface and a poor soil. The population is 14,000, of which all save 1,000 are collected in the main seaport—Charlotte Amalie. The harbour of this place is excellent, and its situation is very favorable for commerce; so the town has become a centre of traffic for ocean steamers of which a number touch there, including those plying from Southampton and St. Nazaire to Aspinwall. The island is, therefore, a valuable possession for a great maritime nation, but it is worth very little to an insignificant power like Denmark. We presume that if St. Thomas becomes the property of our Government it will be treated as a Territory, and permitted to send a delegate to Congress, with no probability that it will ever become a State.—*S. F. Alta*.

ARREST OF AN AUSTRIAN FORGER FOR FRAUDULENTLY OBTAINING 100,000 FLORINS.
The *New York Evening Post* of January 16th says: Adolphus Schwartz, one of the passengers by the steamer Bremen, which arrived at this port to-day from Bremen, was arrested by order of United States Marshal Murray, on a charge of forgery, committed in Vienna, the sum involved being 100,000 florins, amounting to \$100,000 of our currency. A cable despatch a few days ago informed the Austrian Consul General of the escape of Schwartz, whereupon that officer made his requisition in usual form under the extradition treaty. The requisition was allowed and detectives were set to watch the arrival of the Bremen. Deputy Marshal Macay and two other officers made the arrest of the alleged forger, who was taken to the Marshal's office and searched. He is a small man, has heavy whiskers and determined expression of countenance, and is not at all excited in regard to his capture. A considerable quantity of gold, paper, etc., was found in his possession, but of what value is not reported. This and other facts are withheld by the counsel for the Austrian Consul General, that lawyer declaring that this is a private matter for the present. Schwartz will be kept in jail until the witness or witnesses against him arrive from Austria, and then he will be examined before a United States Commissioner. The crime, it is reported, was committed in Vienna.
THE PEOPLE'S FRIEND.
PERRY DAVIS'
VEGETABLE PAIN KILLER.
The Greatest Family Medicine of the Age
Taken internally, it cures sudden colds, coughs, etc., weak stomach, general debility, nursery sore mouth, canker, liver complaint, dyspepsia or indigestion, cramp and pain in the stomach, bowel complaint, painters' colic, Asiatic cholera, diarrhoea, and dysentery. APPLIED EXTERNALLY, cures rheumatism, neuralgia, sciatica, sprains, bruises, corns, burns, and sprains, swollen joints, ringworm and tetter, broken breasts, frosted feet and chilblains, toothache, pain in the face, neuralgia and rheumatism. IT IS A SURE REMEDY FOR AGUE AND CHILLS AND FEVER.

DR. HAZEN'S is the founder of a new Medical System. The human system, whose vast interior encloses the stomach and paralyzes the bowels, must give precedence to the man who restores health and appetite, with from one to two of his extraordinary Pills, and cures the most violent sores with a box or so of his wonderful and all-healing Salve. These two great specifics of the Doctor are fast superseding all the stereotyped nostrums of the day. Extraordinary cures by Maggell's Pills and Salve have cured the eyes of the public to the belief that the (so-called) remedies of other quacks are a mere necessity for another. One or two of Maggell's Pills suffice to place the bowels in perfect order, the stomach, etc., at ease, and restore the spirits light and buoyant. There is no griping, and no reaction in the form of constipation. If the human system is feeble, it is invigorated. This last quality makes the medicines very desirable for the weak and delicate. Diseases and chronic diseases are literally extinguished by the direct power of Maggell's Salve. In fact, it is here announced that **Maggell's Pills and Salve** are sold by all the leading Dispensaries, Chemists, and all Druggists, at 25 cents a box. For sale at the wholesale and retail drug stores and groceries.

FIRE INSURANCE BUSINESS IN SAN FRANCISCO.—According to official returns, the premiums received by the various Insurance Companies of San Francisco, for the month of December, were apportioned as follows: Pacific, \$59,480; Union, \$22,390; Firemen's \$16,653; Merchants' Mutual Marine, \$16,453; National, \$15,719; North British and Mercantile, \$9,746; Occidental, \$9,000; Builders', \$8,051; San Francisco, \$7,435; Imperial, \$7,164; California Home, \$5,281; Home Mutual, \$5,185; California Fire, \$5,148; British and Foreign Marine, \$4,481. Total premiums received in one month by 14 companies, \$172,215. Averaging the rate of insurance at 1½ per cent, which is believed to be a correct allowance, the value of the property insured in December would be about \$14,000,000; and at the same rate for 12 months the risks assumed by our local insurance companies in one year would amount to \$168,000,000—a sum within \$32,000,000 of the assessed value of all the taxable property in the State, according to a late statement from the Controller, which makes the total of assessed values \$200,000,000. The California companies are: the Pacific, capital stock \$750,000—about to be increased to \$1,000,000; Union, \$750,000; Fireman's Fund, \$500,000; National, \$1,000,000; Home Mutual, \$1,000,000; Merchant's Mutual, \$500,000; San Francisco, \$300,000; Occidental, \$300,000; California, \$200,000; Builders', \$50,000. The total capital of these ten companies is \$5,350,000, and the amount paid in \$4,407,649. Their outstanding risks, December 31st, amounted to \$18,405,461. The amount of risks written during the year was \$81,045,209. Their income last year was \$1,720,892; disbursements, \$1,241,562. The dividends declared during the year 1886 were as follows: Pacific, \$180,000; Union, \$75,000; Fireman's Fund, \$80,828; California, \$36,000; San Francisco, \$35,925. The Pacific, Union and California dividends were equal to 2 per cent a month on the par value of their stock. The Fireman's Fund and San Francisco dividends were equal to 1½ per cent. Other companies made dividends of 1 per cent and less. Only a portion of the profits from business is divided among the stock holders, the balance called the surplus, is retained to meet any contingency or extraordinary expense the company may have. The new buildings being erected for the home companies are among the finest in the city. The Pacific building, on the northeast corner of California and Leidesdorf street, covers a lot 30 by 80 feet, and will cost \$125,000. The Fireman's Fund building, corner of California and Sansome, cost \$100,000. The Union purchased a house and lot for \$60,000, which is valued now at \$90,000. The company has also bought the business of the California Lloyds for \$300,000, and a portion of the business of the California Home, which is relinquishing business. The Merchant's Mutual fitted up the old Tehama Hotel on California street, at a cost, with lot, of \$80,000.—*Bulletin.*

SUDDEN DEATH OF MR. JOHN J. COCHRANE.—Those who met Mr Cochrane yesterday afternoon in the enjoyment of robust health, and busily engaged in his usual avocations, will scarcely realize the fact that a few minutes after six o'clock in the evening he was a piece of insensate clay! The circumstances attending this melancholy occurrence, so far as we care to make public to-day, are these: Mr Cochrane came home at 6 o'clock from his office, and complaining to his wife of feeling unwell, immediately passed up stairs and commenced to undress; while so doing he was seized with a spasmodic fit to the floor, but quickly recovering his feet, removed the remainder of his clothing and sprang into bed. He then complained of a burning sensation in the stomach, appeared to be in great agony for a few moments, when he was seized with another spasm and died. Drs Ash and Dickson were sent for, but long before their arrival the unfortunate gentleman had expired. It was reported last evening that Dr Dickson had pronounced the cause of death to be apoplexy. An inquest will be held to-day by Mr Pemberton. Mr Cochrane was aged about 40 years, and leaves a wife and four beautiful children to mourn his untimely end. He came to this country in 1859, and has been an enterprising and valuable citizen. During the last session of the Island Assembly he sat for Saanich District.

INQUEST.—An inquest was yesterday held over the body of Robert Turner, master of the schooner Anna, the circumstances attending whose death were reported in yesterday's COLONIST. The evidence of a seaman who was on board when deceased returned to the vessel on Monday, between two and three o'clock, described the captain's appearance, which seemed much as usual. He requested witness to move a little from where he was sitting in the cabin and then lay down and expired almost immediately afterwards. Dr Davie deposed to having in conjunction with his son, made a *post mortem* examination of the body; when he found the pericardium filled with blood; he further discovered that the left auricle of the heart had been ruptured, which had supervened on the accelerated action of that vital organ arising from disease; deceased appeared to be about 50 years of age; he was a native of Scarborough, England, and had no property. Dr Davie said that death must have been nearly instantaneous; he was called in on Monday, but found the man quite dead. After a short consultation the jury brought in a verdict of death from natural causes.

FROM NANAIMO.—The steamer Isabel, Captain Chambers, returned from Nanaimo at 2 o'clock yesterday morning; when off this harbor, she cast off the American bark Rival laden with 540 tons of coal, which vessel she had towed down from Nanaimo. The weather at Nanaimo has been intensely cold, and about five inches of snow lay on the ground. The ship Silas Greenman, from San Francisco, had not arrived when the Isabel left, but a ship's light was observed yesterday morning in Mosquito Pass, and is believed to have been shown by that vessel, which had probably come to anchor there.

To preserve your health, cleanse your blood when it becomes vitiated and foul. Many are the symptoms which sound the note of alarm. Fail not to heed them. Indigestion, Nausea, Lassitude, Headache, Wandering Pains, Bilious and Eruptive Affections, are so many signals to tell you of disease in the blood. Remove it, and they disappear. How? Take AYER'S COMPOUND EXTRACT OF SASSAPARILLA. It is effectual for its purpose; purifies the blood, expels disease and restores the deranged functions of the body to their healthy action.—Corydon (Ind.) Argus.

EXCURSION TRIP.—It is proposed that an excursion party will leave here on the New World on Good Friday (19th April) and visit all the ports on the Sound, returning on the following Monday. The party will receive every attention while on board, and will be lodged and fed without expense to themselves beyond the sum demanded as passage money. As the weather will be extremely delightful about the date proposed for the trip, there is no doubt that the participants will enjoy themselves to their heart's content. We hope that the proposition will be carried out.

LECTURE.—It will be observed from our advertising columns that P. Comrie, Esq., M.D., of H. M. S. Sparrowhawk, will this evening deliver the first of two lectures on "Air and Water." We understand that the lecture will be illustrated by a series of chemical experiments, and as it will have a bearing upon the sanitary condition of the city, we hope that the citizens will avail themselves of the occasion.

A STRANGE STORY is told about an egg merchant in one of the Paris markets. Having been indisposed he had kept his warehouse at a high temperature, at the recommendation of his doctor. A morning or two ago he was awakened by a strange noise, and on jumping up, he saw on the floor about a hundred and fifty chickens, which had been hatched by the heat, while the floor was strewn with egg shells.

ACCIDENT.—After being cast off from the steamer Isabel, at an early hour yesterday morning, the bark Rival suddenly lifted and ran into the steamer, carrying away a portion of one of the latter's paddle-boxes, and doing damage to the extent of about \$100. The Rival then stood off down the Straits with a fair wind, and the Isabel came to her wharf. A few hours' work yesterday "fixed things."

The Glasgow Herald announces the apprehension in the city of a local debtor having large liabilities. He had been lodging in a hotel there, and was found in the disguise of female attire, with a Paisley shawl, a velvet bonnet and veil, and a large brooch, with no want of crinolines.

FROM BURRARD INLET.—At Capt. Stamp's mills we learn that the machinery has all been set, and that the arrival of belting is only awaited to set everything in motion. The snow has been deep at the Inlet, but the fall was not so great as at New Westminster.

CHAMBER OF COMMERCE.—A special meeting of this body will be held to-day, at two o'clock, and as we understand that a matter of very great importance will come before the Chamber for discussion, we hope that the attendance will be full.

The schooner Black Diamond, laden with Nanaimo Coal, arrived yesterday in tow of the Steamer Diana. The Schooner landed the steam engine at Bellingham Bay, and on her return trip called at Nanaimo for the cargo of coal.

RELIGIOUS.—Yesterday being Ash Wednesday, the usual religious services in connection with the day were held at the Cathedral, St. John's, and the Catholic churches in this city.

FURNISHED houses and apartments in Paris are now only let to occupiers for a short period, and in many cases no engagement is made to extend beyond the month of January.

THE FLY.—This steamer has been sold to Captain Frain, and will be rebuilt, renamed and refurnished, and placed in a profitable trade.

A PETITION to His Excellency, praying for the release of the woman Simpson, has received many signatures at Nanaimo.

H. M. S. Shearwater will go to New Westminster on Monday next.

MR DALLY takes pleasure in announcing to the inhabitants of Victoria and its vicinity that the alterations in his photographic gallery are now completed, and that those who favor him with a visit may depend upon getting a faithful portrait. Views of houses or scenery photographed in an artistic manner, Fort street, near Government.

NO REMEDY IN THE WORLD ever came into such universal use, or has so fully won the confidence of mankind, as AYER'S CHERRY PECTORAL for the cure of Coughs, Colds and Consumption.

VICTORIA RIFLE CORPS.—The Corps will parade in full uniform on Monday, at 8 p.m., James Bay. Attendance compulsory. Musketry Instruction, Friday at 8 p.m., sharp, James Bay. By order—J. GORDON VINTER, Lieut. and Adj.

HOLLOWAY'S PILLS.—Indigestion and Liver Complaints.—The digestion cannot be long or seriously disordered without the derangement being perceptible on the countenance. These Pills prevent both unpleasant consequences; they improve the appetite, and with the increase of desire for food, they augment the powers of digestion and assimilation in the stomach. Holloway's Pills deal most satisfactorily with deranged or diseased conditions of the many organs engaged in extracting nourishment for our bodies from our various diet—the liver, stomach and bowels, over all of which they exercise the most salutary control. By restoring, at an early stage of the malady, to their purifying and laxative state, the dyspeptic is speedily restored to health and strength, and his system gradually cleansed.
